Education

University of Michigan - Ann Arbor, MI *Aug 2023 - Present*
Major: Computer Science

- **GPA**: 3.7
- **Relevant Coursework:** EECS 280 (Programming and Introductory Data Structures), EECS 203 (Discrete Mathematics), Physics 140 & 240 (General Physics I and II), EECS 281 (Data Structures and Algorithms)

Dreher High School - Columbia, SC *Aug 2019 - May 2023*

- **GPA**: 3.85

Work Experience

Remote Consultant, Information and Technology Services, University of Michigan *April 2024 - Present*

- I navigate and troubleshoot diverse technical challenges, delivering solutions to maintain client productivity
- I communicate complex IT concepts clearly, tailoring my approach to match the unique needs and understanding of each client.

Intern, U.S. Agency for International Development *Aug 2024 - Present*

- I collaborate with USAID's REFS Senior Digital Advisor and other interns to explore innovative applications of generative AI, designing tools that directly enhance food security programs in low- and middle-income countries
- Build and test AI-enabled solutions such as agricultural advisory chatbots, machine vision for crop health, and predictive analytics for credit loans, ensuring the efficacy and accuracy of these technologies across multiple AI models.

Research Assistant, Department of Physics & Astronomy - University of South Carolina *June - Aug 2023*

- Analyzed quasar and galaxy spectra looking at their absorption lines to determine what elements are found within them.
- Extracted the data using Excel to present to the professor and graduate students working in the lab.

Projects

Discord AI Chat Bot, https://github.com/aidanvidal/Discord-AI-Talk-Chat-Bot *December 2023*

- I built a dynamic Discord chatbot with voice interaction capabilities using Python, Discord.py, OpenAI GPT-3.5, and Google Cloud's TTS API, allowing the bot to respond to text queries with AI-generated responses and convert them into speech for seamless voice channel interactions..
- I gained valuable knowledge in handling Discord voice connections, integrating various APIs, and managing conversational AI, showcasing my ability to develop engaging, interactive applications that leverage cutting-edge technology.

Real Time Chat App, https://github.com/aidanvidal/Chat-App *August 2024*

- I developed both a desktop and web chat application using Electron, Flask, websockets, and SQLite, expanding my understanding of networking by building custom HTTP requests and websockets from scratch.
- Through challenges like debugging, converting the desktop app to a web version, and deploying the app using DigitalOcean, I gained hands-on experience in backend API design, cloud deployment, and database management, significantly improving my technical and problem-solving abilities.

Skills

- Programming experience in C++, Java, Java Script, Python, and HTML & CSS.
- Experience using Excel, AI API's, Pandas, Numpy, Pytorch, Godot, and REST API's.
