Education

University of Michigan - Ann Arbor, MI *Aug 2023 - May 2027*
Major: Computer Science

- **GPA**: 3.73
- **Relevant Coursework:** Discrete Mathematics, Data Structures and Algorithms, Computational Linear Algebra, Calculus III, Web Development, Computer Organization

Dreher High School - Columbia, SC *Aug 2019 - May 2023*

- **GPA**: 3.85

Experience

Team Member, SOCR - Multidisciplinary Design Program, University of Michigan Jan 2025 - Dec 2025

- Developing a blockchain-powered data marketplace to enable secure, trustless data-sharing between hospitals and analysts through smart contracts, Web3, and Solidity, integrating statistical obfuscation techniques for privacy preservation.
- Collaborating in a multidisciplinary team to design and implement smart contract-driven agreements, facilitating stakeholder negotiations, proof-of-stake mechanisms, and dispute resolution, while leveraging React and Flask for full stack development.

Intern, U.S. Agency for International Development *Aug 2024 - Jan 2025*

- I collaborate with USAID's REFS Senior Digital Advisor and other interns to explore innovative applications of generative AI, designing tools that directly enhance food security programs in low and middle income countries
- Build and test AI-enabled solutions such as agricultural advisory chatbots, machine vision for crop health, and predictive analytics for credit loans, ensuring the efficacy and accuracy of these technologies across multiple AI models.

Remote Consultant, Information and Technology Services, University of Michigan *April 2024 - Present*

- Collaborate with cross-functional ITS teams, maintaining professional communication and handling escalations effectively.
- Perform ticket lifecycle management and continuously identify opportunities for process improvement through proactive feedback and quality assurance.

Projects

Real-time Collaborative Code Editor, https://github.com/aidanvidal/Real-time-Code-Editor *September 2024*

- Developed a real-time collaborative code editor using React, Node.js, ShareDB, WebSockets, and MongoDB, enabling multiple users to edit code simultaneously with instant updates across all clients.
- Overcame challenges in cursor synchronization, document syncing, and secure code execution, demonstrating problem-solving skills and proficiency in full-stack development.

Discord AI Chat Bot, https://github.com/aidanvidal/Discord-AI-Talk-Chat-Bot *December 2023*

- Built a dynamic Discord chatbot with voice interaction capabilities using Python, Discord.py, OpenAI GPT-3.5, and Google Cloud's TTS API, allowing the bot to respond to text queries with AI-generated responses and convert them into speech for seamless voice channel interactions..
- I gained valuable knowledge in handling Discord voice connections, integrating various APIs, and managing conversational AI.

Skills

- Programming experience in C, C++, Arm Assembly, Java, JavaScript, Python, HTML & CSS, and React.
- Experience using Excel, AI APIs, Pandas, Numpy, Pytorch, Godot, REST APIs, Node.js, WebSockets, and MongoDB.
